EXECUTIVE SUMMARY

- Current Technology Usage
 - Top 10 Languages
 - Top 10 Databases
 - Platform
 - Top 10 WebFrames
- Future Technology Usage
 - Top 10 Languages
 - Top 10 Databases
 - Platform
 - Top 10 WebFrames
- Demographic
 - Gender
 - Age
 - Geographical
 - Education level

INTRODUCTION

- Background
 - Being a Data analyst by a global IT and business consulting services firm, this is a regular data analytic report for the company getting latest IT labour market information
- Purpose
 - To remain competitive and keep pace with changing technology, our company regularly analyzes data to help identify future skill requirements.
- What questions we need to focus
 - What are the top programming languages in demand?
 - What are the top database skills in demand?
 - What are the popular IDEs?

METHODOLOGY

- Data Collection (Sources)
 - Stack overflow developer 2019 survey (RDBMS)
 - GitHub job postings (Web)
 - Programming languages annual salary (excel)
- Data Wrangling (Python)
- Data Exploration (Python)
- Data Cleaning (Python)
- Data Visualization
 - Python matplotlib & turtle
 - IBM Cognos
- Presentation

RESULTS

PROGRAMMING LANGUAGE TRENDS

Top 10 Languages Developers Worked With

Top 10 Languages Developers Desire Next Year

PROGRAMMING LANGUAGE TRENDS - FINDINGS & IMPLICATIONS

Findings

- **JavaScript** and **HTML/CSS** are the **top two** programming languages that have been used this year and will continue to be in high demand in the coming year
- There is a **high demand growth** in **Python** (rank 5 -> 3) and **TypeScript** (rank 8 -> 5) from this year to next year
- **PHP** and **C++** are **not desired** than Kotlin and Go for developers in coming year

Implications

- **Web developments** is still **high demand** in the future and developers proficient in these languages can expect a steady stream of job opportunities
- Python's **versatility and ease of use** (supporting SQL), along with TypeScript's static typing for JavaScript, make them attractive choices for developers and organizations.
- This change may be driven by factors such as the **rise of modern frameworks and technologies** associated with Kotlin and Go

DATABASE TRENDS

Top 10 Databases Developers Worked With

Top 10 Databases Developers Desire Next Year

DATABASE TRENDS - FINDINGS & IMPLICATIONS

Findings

- **PostgreSQL** is consistently **popular** and ranks high in both the "work with" and "desire" chart
- **MongoDB and Redis** experience significant increases in desirability, indicating a **growing demand** for **NoSQL** databases and in-memory data storage solutions
- **Microsoft SQL Server** maintains a strong presence in both lists, showcasing its continued relevance

Implications

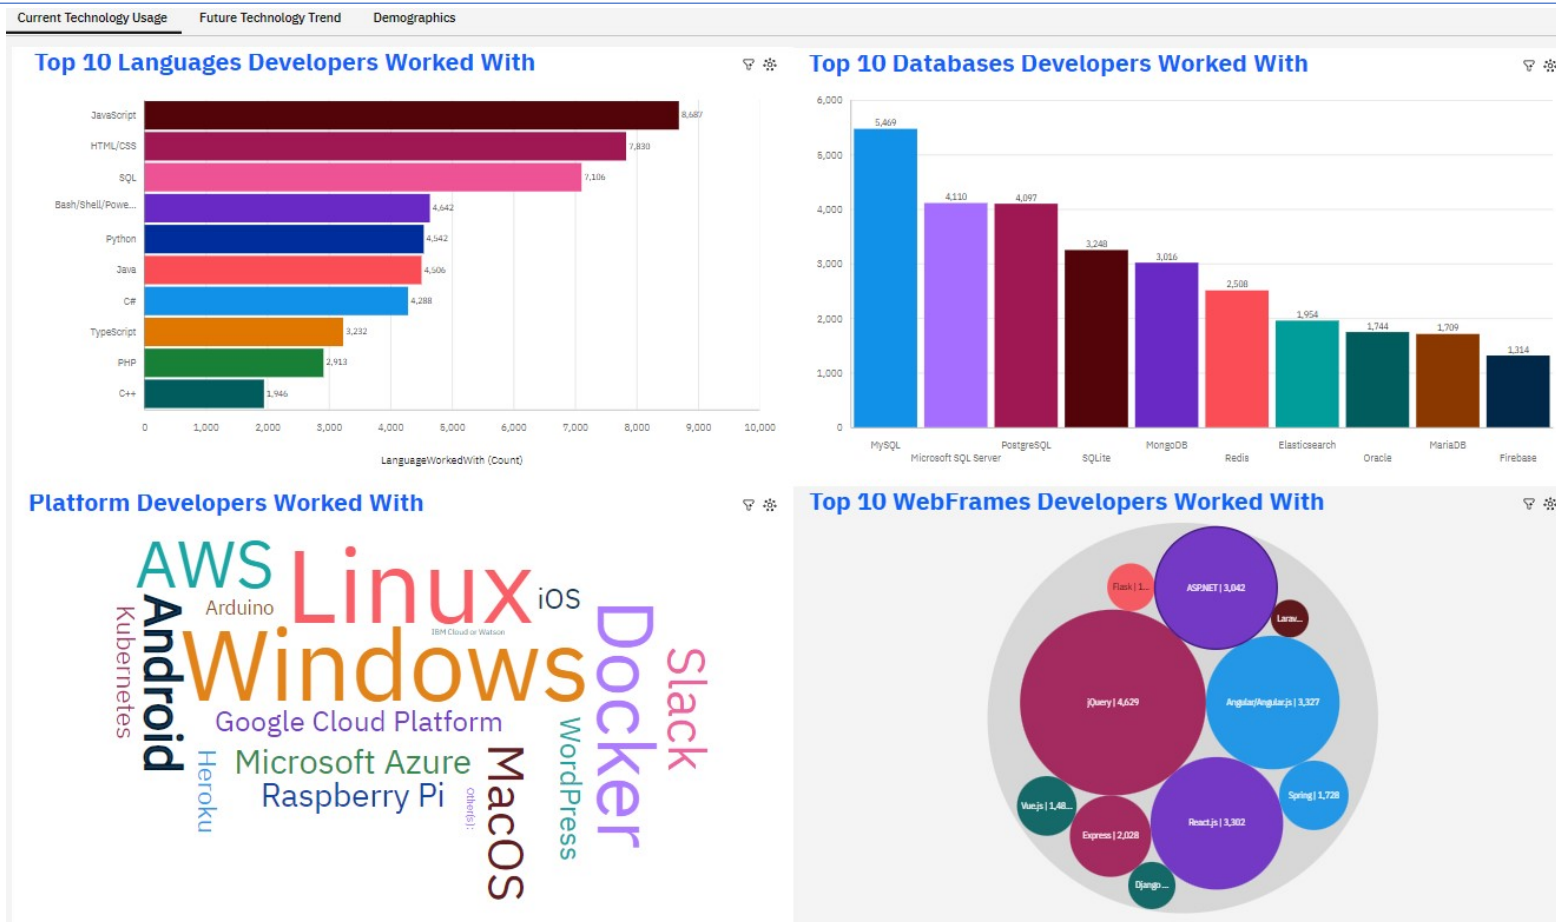

- Focus on **enhancing skills** in **PostgreSQL** to capitalize on its popularity and high demand
- Consider **expanding expertise** in MongoDB and Redis to meet the growing demand for **NoSQL databases** and in-memory data storage solutions
- **Stay updated** with advancements in **Microsoft SQL Server** to maintain proficiency in this widely used database management system

DISCUSSION

- What is the trend of different type of technology tools?
- Geographical distribution of IT developers
- The Age, Gender and education of IT developers

OVERALL FINDINGS & IMPLICATIONS

Findings

- There is always a rapid change in IT industry every year
- Most of the IT developers are focused in USA
- There is extreme gender discrimination

Implications

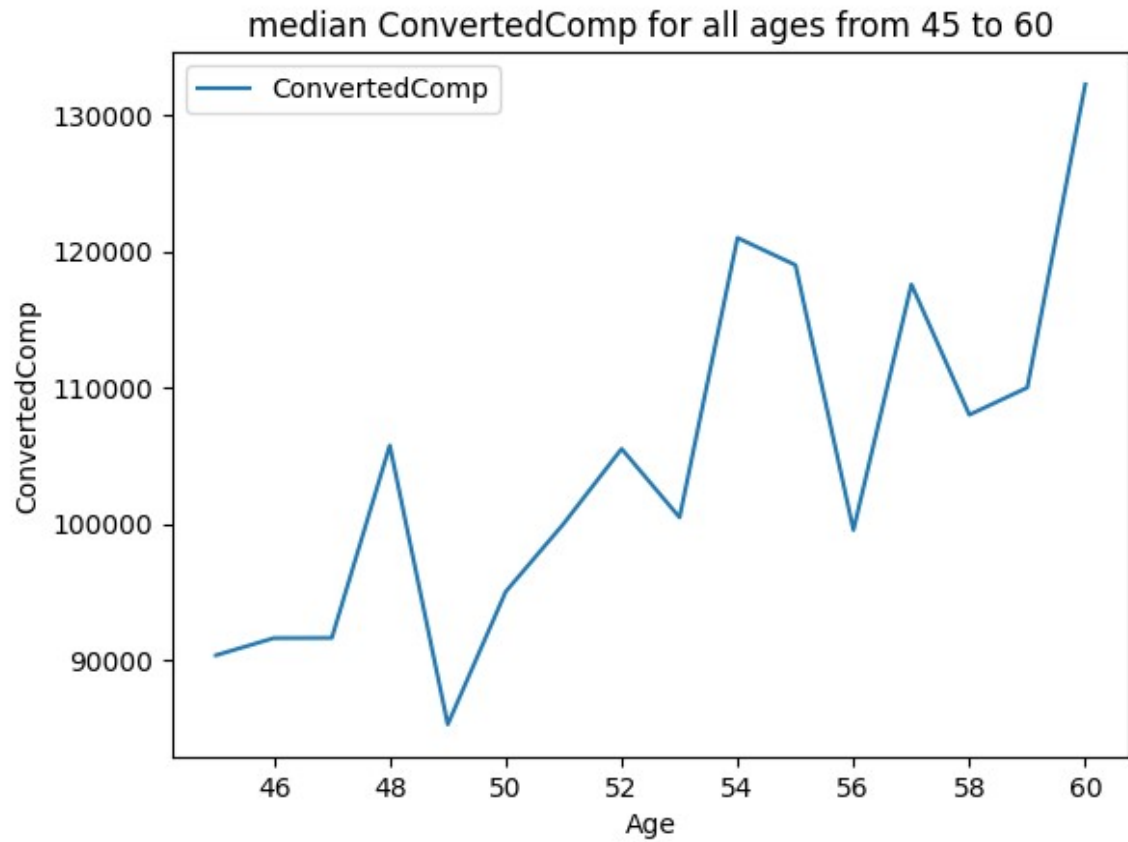

- Organisation and Developer should always update the latest skill set to fulfill the market demand
- Compared with USA, IT industry is still developing and there are high opportunities in other countries
- Organizations should consider female developers on an equal footing with male developers

CONCLUSION

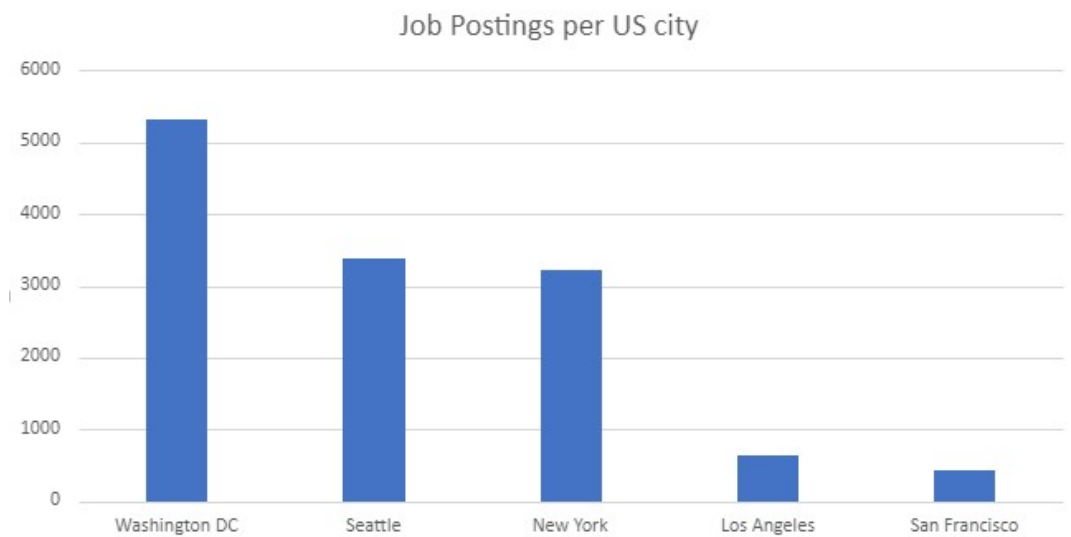

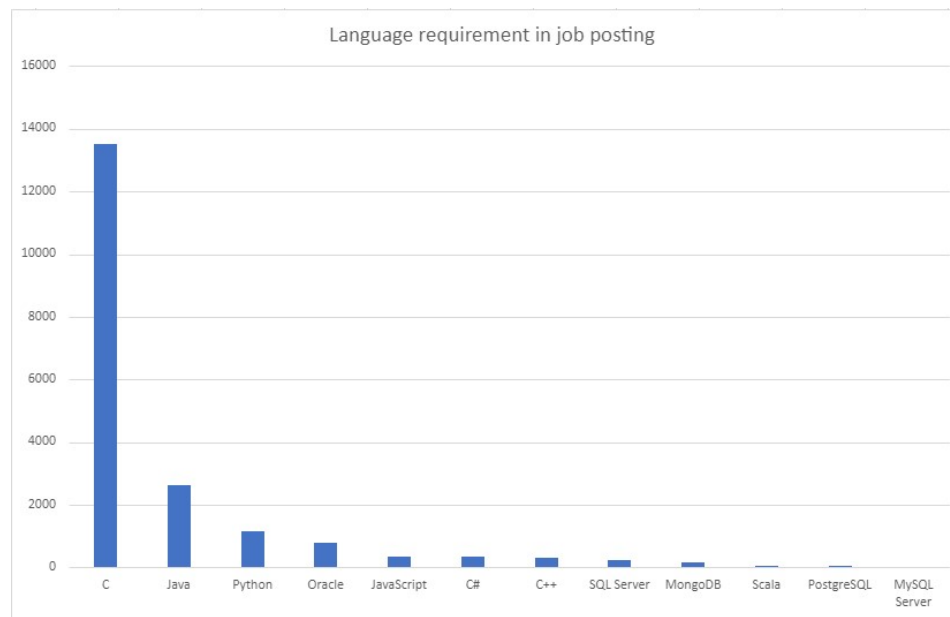

- Current Technology Usage
 - Languages
 - Databases
 - Platform
